ABOUT ME

I am a recent graduate in computer science engineering, fueled by a passion for web development and a solid foundation in programming and software engineering. I possess demonstrated expertise in creating web applications utilizing technologies such as MONGODB, EXPRESS.JS, NODE.JS, JavaScript, ReactJS, HTML, and CSS(MERN STACK). Eager to leverage my skills and knowledge, I aim to contribute to dynamic web development projects in this constantly evolving field. I am prepared to bring both a creative and analytical approach to a professional development team.

PROJECTS

TRAVEL STORIES WEBAPP ————— 2025

- Developed a responsive travel story web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure user authentication and authorization mechanisms with JWT.
- Designed and integrated CRUD operations to allow users to create, edit, delete, and view travel stories.
- Optimized API calls and database queries for efficient data handling and improved performance.

SORTING VISUALIZER WEBAPP ————— 2025

- Developed a web application to visually demonstrate sorting algorithms in real-time using React.js.
- Implemented popular sorting algorithms, such as Bubble Sort, Merge Sort, Quick Sort, and Insertion Sort.
- Utilized React's state management for dynamic updates to visualized data during sorting processes.

CALCULATOR ————— 2024

- Developed a responsive calculator app using JAVASCRIPT for dynamic and efficient calculations.
- Designed a clean UI/UX with CSS and HTML, prioritizing user experience.
- Ensured compatibility across various devices and screen sizes.
- Optimized the script for faster execution and smooth user experience.
